

.NET Software Engineer

TOPAZ Technologies has a .NET Software Engineer position available in Austin, Texas. We're looking for a highly productive and pragmatic individual who loves to solve problems. You'll be joining an exciting team and working closely with subject matter experts to develop, enhance and maintain features for the company's Web suite of products. TOPAZ is working with many of the latest technologies and employs several highly-skilled engineers who are eager to share their knowledge. Please don't apply if you don't like to learn or share information.

TOPAZ Technologies is an established leader in the development and support of software solutions for medical research. The company has a solid foundation of clients including leaders in the pharmaceutical, biotech, university, government, and private research organizations. TOPAZ is privately owned and offers excellent benefits to employees.

Requirements

- 3-5 years of software development experience using C# in web applications
- Possess good communication skills
- Oracle or SQL Server experience
- Working knowledge of common design patterns
- Working knowledge of scripting languages such as Ruby or Perl

Responsibilities

- Work in an Agile/Lean environment
- Provide technical analysis and designs for features
- Incrementally estimate and implement features from feature backlog
- Develop automated tests for implemented features
- Develop skills with ASP.NET, C#, Silverlight, NHibernate, Lucene.NET, Subversion, GIT, TeamCity, Ruby, WIX, ActiveReports, Oracle, SQL Server, DDD, CQRS, SOLID, TDD, BDD and more

TOPAZ is a dynamic company where we strive to maintain a fun, team-oriented atmosphere. We are looking for motivated, self-starting individuals who can grow with the company. Salary will be commensurate with experience. Final candidates will be subject to a background check.
